The Future
Reimagined

BEFORE THE FUTURE DEFINES US, WE'RE WORKING TO DEFINE IT.

AN AFRICAN THOUGHT LEADER.
THE UNIVERSITY OF JOHANNESBURG, SOUTH AFRICA.

Our approach to teaching and learning is founded on both the needs of our students in the African context and on the ubiquity of the technological environment in which they will practise what they learn. We see the future as one brimming with energy and possibility, with untold opportunity for those ready to explore it, for those who are prepared with the right conceptual tools to help shape it.

We prize the value of human imagination, and its ability not only to meet the challenges that face us, but also to prevail, and indeed define, the future world in ways that benefit everyone. Our internationally recognised research and teaching staff and our leading facilities enable our students to derive the full benefit of their studies in an embracing learning environment predicated on the future.

That's because we believe that the future belongs to those who reimagine it.

Welcome

Welcome to the final Higher Education Report (HER) for the 2021 QS World University Rankings cycle. Appropriately, we end the cycle of reports as we had begun, with one of our most popular and ultimately largest: the World University Rankings by Subject 2021.

While this is the final HER for the 2021 series before they restart in June with the 2022 QS World University Rankings, this is by no means the final publication, ranking, or insight report until then. There is still the *Yearbook* and the fourth edition of *QS Global Education News* to look forward to, as well as the USA and Online MBA Rankings, and the annual *International Student Survey* among others.

We explore how the challenges of 2020 were transformed into student and institution-centric positives.

In this edition of the Higher Education Report, we look back on some of the changes that took place throughout 2020. We explore the journey of QS' student fairs from in-person to digital, and how the challenges of the year were transformed into student and institution-centric positives. Outside reduction of travel costs, a boost to the available metrics has seen institutions receive more data to determine their recruitment needs.

We also highlight some of the discussions from the Reimagine Education Conference in December 2020, to see how edtech is adapting to help students and educators. A key discussion point, which remains relevant to all education stakeholders, was around the concept of wellbeing and how best to foster it.

Finally, there are some changes in progress which will see a new QS look and sound, such as a new logo. We look forward to sharing more in the coming months.

Until next time, stay safe.

Subject Rankings Overview

By Dr Andrew MacFarlane,
Rankings Manager, QS Quacquarelli Symonds

Welcome to the QS World University Rankings by Subject 2021. This mammoth ranking evaluates more than 3,800 individual university programs, taken by students at more than 1,440 universities in 85 locations across the world, across 51 academic disciplines. This is our largest subject ranking to date, with over 1,000 more programs ranked than last year's edition, and the largest ranking by subject on the market.

At a time of uncertainty in higher education, QS seeks to provide a stable and reliable tool that our students can use to benchmark and compare institutions in their journey through higher education.

The United States continues to dominate the field, having around a fifth of all ranked programs. The Top 2 institutions for programs ranked are Harvard University and Massachusetts Institute of Technology. The United Kingdom, China, Australia, and Germany complete the Top 5 by number of institutions ranked.

We have considerably extended the range of programs evaluated in Business and Management Studies, Computer Science and Information Systems, Medicine, Education, Environmental Sciences and Pharmacy and Pharmacology.

This year, 850 institutions find themselves with entries in subject areas they haven't previously achieved a ranking. The United States, United Kingdom, China, Canada, and Italy are the Top 5 countries with the largest number of new programs ranked. China in particular has seen a strong rise in performance with a record number of Chinese programs attaining a Top 50 rank. Russia too can be pleased with its increased performance, with a record number of Russian programs attaining Top 20 ranks.

Whilst reputation remains a core component of our subject rankings, many of the new additions and increases in performance are attributable to improved research performance. Recent years have seen a rise in global research collaboration, and it is perhaps no surprise, then, that the locations in which we see strong international research collaboration are very closely correlated with those that achieve the top shares of QS' subject ranking.

International research collaboration is particularly high in the UK, Netherlands, Denmark, Australia, France, Hong Kong, Switzerland and Singapore. Indeed, Singapore and Hong Kong both see exceptionally strong rates of international research

collaboration at above 70 percent. Correspondingly, National University of Singapore, Nanyang Technological University, University of Hong Kong, and The Chinese University of Hong Kong have between them around 20 percent of the share of programs for the Top 10 institutions in Asia in this ranking.

Institutions at the top of their fields are, of course, tackling the big research issues of our time. COVID-19 and immunology, cancer research, obesity, Brexit, and the effect on financial markets – in all of these topics we can see a strong focus in the research community, and in particular our more highly evaluated regions and institutions.

When we looked across different research trends this year, we saw multi-disciplinary approaches to solving these issues. In Mathematics and Economics, both showed trends on market volatility; in Medicine, we saw strong correlation with our top ranked institutions and

the research focus being put towards COVID-19; in Environmental Sciences we saw trends in air quality and sustainability which were also mirrored in Economics; and in Physics we saw shared focus on renewable energy and climate change also mirrored in Environmental Sciences.

"The United States continues to dominate the field, having around a fifth of all ranked programs. The United Kingdom, China, Australia, and Germany complete the Top 5."

We have maintained a consistent methodology this year. This allows students and institutions alike to benchmark historical performance more easily. Therefore, we can begin to look at what the top performing institutions have in common, and some areas for growth from emerging institutions.

Equipping students for life after graduation is an

especially important role for institutions, particularly as many students face uncertain futures. In our annual QS Global Employer Survey, we looked at the skills most important to employers, and the skills of graduates they found the most and least satisfied. The most important skills were problem solving, communication, and team work.

Employers were the least satisfied with graduates' commercial awareness, leadership and negotiation skills. Professional experience was the most sought after characteristic of the global employers we surveyed. It is paramount that institutions prepare their students for the realities of the global workplace. By ensuring that work experience is woven into the fabric of their education, as well as integrating these soft skills into the learning experience, institutions will be supporting their students' futures in their regions and beyond.

METHODOLOGY: DEFINITIONS & WEIGHTINGS

	ACADEMIC REPUTATION	EMPLOYER REPUTATION	CITATIONS PER PAPER	H-INDEX
	Between 2016 and 2020 QS has collected votes from over 100,000 academics around the world. Each academic counted has given their opinion on universities in their fields of expertises.	The employability metric is based on employer reputation. Over 50,000 global employer votes have been taken into account between 2016 and 2020 giving us a large pool of information in terms of hiring levels. Employers across all sectors and industries have taken part in the survey and include Facebook, Google, Uber, Wells Fargo, Bank of America etc.	This ratio measures the average number of citations obtained per publication, and is an estimate of the impact and quality of the scientific work done by universities. To avoid anomalous results, only the institutions producing a minumum number of papers in the last five years are evaluated.	The h-index is an index that attempts to measure both the productivity and impact of the work published by the institutions' scientists and scholars. The index is based on the set of the institution's most cited papers and the number of citations that they have received in other publications.
Arts & Humanities	60%	20%	10%	10%
Engineering & Technology	40%	30%	15%	15%
Life Sciences & Medicine	40%	10%	25%	25%
Natural Sciences	40%	20%	20%	20%
Social Sciences & Management	50%	30%	10%	10%

We use a variable approach to the weightings for the different subjects. The chart below provides details of the combinations used in the 2021 edition of the rankings.

UNIVERSITI
TEKNOLOGI
MARA

made in UiTM /
made for the world

UiTM solar power plant was set up to promote green technology that contributes to the socio-economic and sustainable development. As the first higher learning institution in Malaysia to own and commercially operate a 50MW photovoltaic plant, Universiti Teknologi MARA (UiTM) is committed to combatting climate change and the rise of global temperatures. This plant is expected to reduce carbon dioxide emissions by 56K per year. With over 180,000 solar panels, it can generate over 80K MWh of clean energy per annum and power more than 22,000 homes.

these are the.global.goals / rewrite the possibilities, repurpose our creations.

A World of Reimagination

EDUCATION REIMAGINED AFTER 2020

By Anton John Crace,
Editor and Programme Designer,
QS Quacquarelli Symonds

The uniqueness that was 2020 is difficult to unpack, and in many ways, it was a year that seemed to compress a decade of history.

Wildfires, elections, and unrest; moments that by themselves would typically mark a year, instead occurred at times simultaneously. This is in addition to a global pandemic.

The uniqueness of 2020, however, created for many educators a dual sense of reflection and urgency. While many were forced to quickly adapt, the periods of isolation through quarantine and lockdowns were also full of creativity, a time to reimagine what was possible.

Going online for the first time, the 2020 Reimagine Education Conference, held in early December, brought together global education leaders to discuss how things have changed and how they will continue to do so in the future.

The shape of things to come

"What we've learnt is that over the last 20 years we know that there's been a major digital revolution that has had a really profound impact on many sectors," says Professor David Maguire, Interim Principal and Vice-Chancellor at the University of Dundee in the UK.

"We only have to look at the way we do our banking today, the way we do retail, and our entertainment.

"They've all changed forever, but I would submit, as of today, universities have not been transformed to anything like the same extent."

According to Professor Maguire, who also serves as chair of education and research digital solutions provider, Jisc, 2020 was a year of reformation for higher education.

"What's happened in the last eight months as a consequence of the pandemic has really had a major impact on universities, and it's made this change, I think, much more urgent."

Based on the findings of Jisc's *Learning and teaching reimagined report*, released in November 2020 in partnership with Universities UK, Advance HE, and Emerge Education, Professor Maguire adds the ongoing pandemic had an immediate impact on perceptions of online education.

Approximately 90 percent of those surveyed in the report said they expected lectures to go online, if they had not already done so in the 2020/2021 academic year. By comparison, previous surveys found only 10 percent thought lectures would go online.

Additionally, roughly 50 percent of respondents, made up of students, lecturers, and leaders, said smaller activities such as seminars and tutorials would or had already gone virtual.

"There's a myth around that students are all now digitally literate in the post-social media world."

Importantly, Professor Maguire tells *QS*, as well as impacting the way institutions have had to operate, COVID-19 has changed their thinking, and the perceived latency or reluctance in implementing a digital revolution in education may soon be over.

"When we spoke to university leaders, few of them really feel those changes will be rolled back and almost everybody is seeing blended learning will be the future," he says, noting an increase in shorter "lecturettes", more use of voting and quizzes to encourage interaction, flipped classrooms, and now, flipped-flipped classrooms.

The people

In creating the modern and future classroom, Professor Maguire says there is a clear need to bring along all stakeholders to ensure they can use the technology to deliver education.

"If you talk to everybody, then the real challenge is upskilling people across universities. Be those senior leaders who really don't necessarily have the digital skills, the digital fluency that they need in the post-pandemic world, [or] academic staff also developing their skills," he says, a point echoed in QS' survey of academics' perceptions and challenges with online education.

In providing the training those working within an institution need, however, Professor Maguire adds it is a mistake to assume students don't also require upskilling to ensure they can meaningfully utilise digital learning tools, regardless of the perception that they are "digital natives".

"Personally, I think there's a myth around that students are all now digitally literate in the post-social media world," he says.

"Our experience is that whilst they've got some digital skills, it's not necessarily those that they need to be successful in their modern university experience."

Executive President of IE University, Santiago Iñiguez, agrees with Professor Maguire's thoughts, and says those institutions that had already been delivering online education had a head start when doors were closed.

Based in Spain, IE University was an early adopter of digital and online learning, having now accumulated two decades of experience in the area. As a consequence, Iñiguez says staff and faculty are now more prepared to be early adopters of further innovations and embrace change.

Khalifa University

RESPONDING TO COVID-19 FOR A BETTER WORLD

In response to the Covid19 pandemic, Khalifa University has stepped up in the global fight to better detect, manage and prevent the spread of the coronavirus around the world. Our researchers are developing 3D printed biodegradable face masks and portable PCR Covid19 testing kits that can give results within 45 minutes.

At Khalifa University, we seamlessly integrate education and research to produce innovations that address the world's most pressing challenges in key areas of energy, water, healthcare, aerospace, robotics and much more.

ku.ac.ae

Importantly, IE University's experience has led to a mindset that is focussed on both student and lecturer, seeing the setting of education solely as the mode of delivery or format, not the end goal.

"I normally say that platforms may be princes and princesses. Content may be king or queen, but the essential element of the whole learning process is the experience," he says.

"The element lying at the core is what the professor does throughout the different formats and methods that we may use."

To this end, Iñiguez says it is important to recognise the stress involved in teaching a class and that going online adds additional elements to the process which can increase risk, exposure, and the potential to fail.

"The objective is to actually make professors orchestrate all these elements in the best possible way and make them feel as comfortable as traditional environments

because that will bring the best possible experience to students in class," he says.

"The work invested in their preparation pays off. We save time, the level of satisfaction of students is higher and they can use our materials and content more freely."

Alongside its mindset that education's setting is the means not the end is IE University's positioning of students' needs, a concept which Iñiguez calls "Liquid Learning".

Through the combination of both synchronous and asynchronous teaching methods, Iñiguez tells *QS* students can chose a path that suits their learning style. Those who are more extroverted and thrive under a live classroom setting with active discussions are able to do so. Introverted students who prefer different types of engagement, can

use asynchronous tools to contribute to class.

"You need to complement the way of delivering knowledge. Even if you flip the class and you ask your students to prepare their sessions beforehand, you need to complement the whole learning experience in order to instil in participants and to develop in them different skills," he says.

"By combining live and asynchronous you can exploit all the synergies."

Do well; be well

As the methods of learning and education adapt and change, the provision of wellbeing for students is also developing for improved outcomes. Just as thoughtfulness is being implemented into learning technologies, student support services are also being interrogated. There is now an evolving interpretation of what wellbeing itself means and how it can be better facilitated.

"There isn't really a universal definition of wellbeing," says Kristina Mereigh, Director of Wellness Services at Smith College in the US, adding while discussions primarily focus on positive emotions and moods, as well as the absence of negative emotions or disease, interpretations of wellness have shifted towards quality of life.

"I think it's less about wellbeing as a whole and more about the individual," she says.

"Finding harmony between times of fulfilment and times of lack. Harmony between times when you have negative and positive emotions and finding the intersecting spaces of relationships and needs in your life and finding the best help for yourself."

Director of Columbia Health at US-based Columbia University, Dr Raphael Coleman, echoes Mereigh's points, adding there is an understanding of the subjective and objective elements in wellbeing; that is self-perception and external conditions.

"When you're thinking about your life, thinking about what you have access to you, thinking about the services that have been provided to you that are in service of supporting your health and wellbeing; that has a strong implication about whether you feel well or not," he says.

"Then there are the objective components; creating the conditions that make it more likely that you will be well. Those things really come hand in hand when thinking about cultivating an environment and spaces that contribute to not only student wellbeing but the wellbeing of our faculty and staff."

Transforming LIVES, ENRICHING *Future*

management & science university

HELLO WORLD

Management and Science University (MSU) is a Malaysia top international private university providing award-winning programmes meeting stringent standards. Committed to excellence in delivering quality human capital across critical-need areas of the global workplace, MSU is Quacquarelli Symonds (QS) and Times Higher Education (THE) ranked as well as Accreditation Service for International Schools, Colleges & Universities (ASIC) and Accreditation Council for Entrepreneurial and Engaged Universities (ACEEU) accredited.

Central library of Princess Nourah bint Abdulrahman University is unique with its automatic arm technology for storing books.

The first university in the Middle East to use (ASRS) system at its Central Library and the third in the world to solve the problem of storing five million books in the library.

Princess Nourah University Central Library halls:

- Hall of Manuscripts and Anecdotes
- Hall of education technologies
- Interactive rooms
- Economic research techniques
- Education with entertainment
- Information databases section
- University Message Hall
- Women's Hall
- Private Library Hall

THE WORLD'S LARGEST WOMEN'S UNIVERSITY

Continuing down this path, argues Ashleigh Hala, Director of Wellness and Prevention Services at Babson College in the US, has profound impacts on the holistic outcomes for students.

"At my institution, we've really tried to position wellbeing as central to students' academic, personal, and professional success, meaning that in order for our students to do well, they must be well," she says.

Shifting perceptions on wellbeing, such as considering financial access, sense of purpose, the influence and degree of shared emotional connections, and accessibility for those with additional needs, has seen a similar repositioning towards prevention over treatment. By doing so, says Hala, public health professionals become more empowered to deliver universal assistance to students.

It's not only the ramifications on academic outcomes, such as improved grades, that are affected by improved approaches to student's' wellbeing, however, and enunciating those benefits more broadly across an entire institution has a two-fold effect on institutional buy-in and goals.

"[We have been] able to talk to colleagues across my institution who may do very different things that they don't automatically see that their role is part of wellbeing, but helping them see that what they're doing is connecting to ensuring that students are well is more of an emerging opportunity working in college health," says Dr Coleman.

An example of how student wellbeing may dovetail with the goals of other departments, he notes, is lessened workloads in combatting student attrition numbers.

"We have people who are coming to talk about retention and persistence, and how what we're doing related to wellbeing is also connected to the institutional interests," Dr Coleman adds.

Measuring approaches

Higher education providers use many different methods and surveys to understand the wellbeing of their student cohorts such as the American College Health Association's Annual Survey and Healthy Minds Survey. While additional tools and services are also available, there are many institutions who are unable to afford their associated cost or resourcing requirements.

Mereigh, however, says institutions should not feel compelled to only use these types of services, and should consider how other communications channels, particularly social media, can facilitate gathering a general understanding of the wellbeing of students.

"Using Instagram insights… putting out pulse surveys on Instagram or Facebook, being able to see using your TikTok how many students are engaging with what kind of material you're putting out are also really good ways to get data," she says.

A good overall metric, but Mereigh stresses in a one-on-one counselling session the individual student should be the focus to identify key focus areas, such as whether they understand to whom they should ask for assistance, or if they have activities they enjoy and why.

"This is one of the first times where we've been in a situation where there is a global pandemic where practitioners are being just as impacted as our students."

With an expanded understanding of the factors that make up student wellbeing, Dr Shawnte Elbert, Associate Dean for Health and Wellness at Central Washington University in the US, says supplementary surveys are also being included in assessment, such as the free of charge Adverse Childhood Experience (ACE) Survey.

"What we're seeing is trauma is really impacting how students engage in services, in programming, in majors," she says.

"[Institutions can build] it into some of the survey tools that they're using for incoming students, so they might put it as an addendum."

Just as the pandemic has impacted the ways in which institutions are considering online education as a lecturer and student-centric endeavour, Hala adds wellbeing should be considered holistically throughout the institution.

"If there ever was a time to put the two surveys together inclusive of students and faculty and staff, now might be that time," Hala says.

"This is one of the first times where we've been in a situation where there is a global pandemic where practitioners are being just as impacted as our students."

Ajman University Reimagines Graduation Ceremony due to Pandemic

More than 1500 students graduated this semester from Ajman University, in a unique drive-through graduation ceremony which AU reimagined due to social distancing norms. These proud AU graduates from diverse streams including Engineering, Law, Humanities, Business, Health Sciences and Mass Communication are ready to take on the world and pursue their dreams!

جامعة حائل
University of Ha'il

A THRIVING UNIVERSITY
IN A VIBRANT CITY

A knowledge hub surrounded by a thriving cultural community
and several corporate headquarters.

- Choose between many programs to study for your degree.
- The university is located in Ha'il city, the northern gateway of Saudi Arabia and the Gulf.
- A spacious university campus designed to help students learn, collaborate and thrive .

Northern Border University

LEADERSHIP AND EXCELLENCE IN THE FIELDS OF EDUCATION AND SCIENTIFIC RESEARCH TO ACHIEVE COMMUNITY DEVELOPMENT WITH INTERNATIONAL STANDARDS

The Northern Border University (NBU) in the Kingdom of Saudi Arabia was established by The Custodian of the Two Holy Mosques, King Abdullah Bin Abdulaziz during his visit to the Northern Border Region in 2007 (1428 H).

The College of Sciences in Arar, which had been affiliated with King Abdulaziz University, was amalgamated into the newly established University and later the Teachers' College.

A number of colleges in Rafha, Turaif and Al-Uwaygilah Governorates were also amalgamated into the University; these colleges together formed the Northern Border University. Several Colleges were inaugurated after the establishment of the University including the Colleges of Medicine, Engineering, Computer Science, Pharmacy, Nursing, Administration and Medical Sciences, and Social Sciences

Qualifying distinguished scientific personnel to contribute to the development of the knowledge community through well-educated and experienced faculty members; preparing qualified administrative and technical staff; developing academically accredited programs, building a holistic infrastructure (laboratories, classrooms, library halls, digital resources); and creating a motivating research environment that meets the researchers' competence.

NBU colleges include:

- College of Medicine
- College of Applied Medical Sciences
- College of Pharmacy in Rafha
- College of Nursing
- College of Engineering
- College of Sciences
- College of Business Administration
- College of Arts and Education in Arar
- College of Home Economics (female)
- College of Computer Science and Information Technology
- College of Sciences and Arts in Rafha
- Community College in Arar
- Community College in Rafha
- Community College in Turaif
- College of Sciences and Arts in Turaif
- College of Sciences and Arts in Al-Uwaygilah (female)

Student Recruitment Events Go Virtual

HOW RECRUITMENT EVENTS ARE A PART OF STRONG RECRUITMENT STRATEGY

By Amity Bacon,
Content Marketing Manager, QS Digital & Events

View
Brochure

Prior to the coronavirus sweeping through every region of the world, student recruitment was a more physical endeavour —it involved in-person interviews, on-campus meetings and tours, and several events throughout the year where representatives could guide students towards the right program or course for their needs. Students were able to access a wide range of physical touchpoints when researching and connecting with institutions.

Face-to-face interactions offered prospective students a chance to "see" in very immediate terms what they could expect from the student experience, from accommodations to campus events and more.

Before the pandemic, a typical student recruitment fair with QS was an immersive experience, with panel discussions and speaking events, representatives showcasing their brand at booths, as well as professional resumé consultants, application workshops, and QS staff guiding students towards institutions of interest.

For QS Connect events, students arrived for pre-arranged, one-on-one meetings with college or university representatives after a QS counsellor had matched them with institutions that met their unique background and interests.

As higher education remains a major and oftentimes emotional investment, prospective students continue to seek out personalised experiences to come to a decision—with personal interactions holding the key. The potential to make lasting in-person connections with institutional representatives is therefore a strong component to any student's research journey.

Even as digital marketing and online community building through social media became an important facet of recruitment strategy before the pandemic, recruitment fairs have maintained their relevance as a highly influential marketing tool.

The Challenge

As colleges and universities closed campuses due to the pandemic, virtual recruitment events needed to evolve alongside a new virtual landscape that had emerged.

Through 2021, deferments and delays to study plans became more commonplace, with students increasingly expecting to begin their studies in 2022 or later.

"As colleges and universities closed campuses due to the pandemic, virtual recruitment events needed to evolve alongside a new virtual landscape that had emerged."

QS ran a series of pulse surveys for international students to understand their study planning during the pandemic. Analysing data from February to November 2020, the number of students that planned to defer or delay their studies rose by 18 percent with over half (55 percent) choosing this option.

During that same nine-month period, just six percent of respondents were no longer wishing to study overseas, a number that declined from February to November. This indicated prospective international students were deferring but not deterred from studying abroad.

When looking at QS client surveys, a similar picture emerged. It became clear overseas study was primarily impeded by travel restrictions, and that the desire to study internationally had not waned.

According to over 400 QS partners that were asked why they recruited fewer international students, 58 percent said it was because students were unable to travel to the institution's country, 43 percent of institutions said it was because these students were deferring their studies to the next academic year, and 43 percent said international students did not want to study online.

Additionally, 22 percent of QS partners listed international student recruitment as one of their top three priorities. 26 percent said geographic diversification was their key recruitment priority and 15 percent said building reputation globally was their key recruitment priority.

The recruitment needs of institutions largely remained unchanged: building brand awareness, engaging with relevant international applicants, and continuing to diversify student pipeline.

"Over 2020, the need for us to facilitate connections between prospective international students and higher education institutions has been critical," says Claire Whittingham, Managing Director of QS Digital & Events.

"Potential students we spoke to were desperate for advice, while international student recruitment remained one of the top priorities for many of our higher education partners."

Case Study

With COVID-19 diminishing the opportunity for students to travel both locally and globally, yet the drive for students and institutions to connect, QS quickly pivoted its approach to facilitate interactions within "the new normal." The organisation moved its first physical event online within three days.

"Everyone was pointed in the same direction in terms of enhancing the online event experience," says Simon Margolis, Head of Candidate Partnerships for Events.

"Our Connect events were able to see significant growth, with matched institutions and candidates realising the huge value in being able to meet virtually for in-depth, private conversations in a very similar way to a physical environment."

The transformation enabled many benefits for attendees— the ease of attending a fair or Connect event online was the first for students. Rather than finding the time out of class or work to attend, then sorting out transportation logistics, students could attend QS fairs from the comfort of their own homes.

KYUNGPOOK
NATIONAL UNIVERSITY

That same ease of use was clear for institution representatives as well. Without constraints such as high travel costs and accommodation or the stresses of navigating a new city, QS partners could sit at their home office and virtually meet anyone from any corner of the globe. In addition, institutions could much more easily bring alumni into the conversation, a major win for colleges and universities that wanted to highlight the student experience to prospects.

"In the past, I saw candidates spend over five hours to get to our events in person," says Penny Russell, Head of Event Operations.

"Whereas now it is far more convenient and easier. We are now able to reach people in places we may not have been able to travel to, helping both candidates and clients grow further connections."

Having carried out market research and testing various platforms for functionality and flexibility, QS decided to use MeetYoo for its virtual fairs and Zoom for Connect events. The swift transformation of the business earned QS a Zoomtopia 'Evolution of the Business Award,' having successfully utilized Zoom for its Spring 2020 Connect events.

"Now it is far more convenient and easier. We are now able to reach people in places we may not have been able to travel to, helping both candidates and clients grow further connections."

Many QS partners took to the new platform immediately.

"The platform was pretty intuitive, and we still had the same exceptional back-end system that provided important lead and prospect information which we loved so much in the past," says fair client Zoe Wall, from the University of Melbourne.

By year's end, the company held nearly 300 events that garnered over 83,000 student registrations and nearly 400 client bookings, having moved to an entirely virtual platform in less than three months.

To meet growing demand, QS expanded its counselling support for Connect events and provided more technical support to fair clients through the platform transition.

After the QS team further analysed candidate behaviours during both virtual fairs and Connect events, new trends began to emerge. For example, candidates began adopting a more consumption-focused approach to content, spending roughly 10 minutes in booths, yet nervous to initiate conversation during live, on-camera interactions.

Breaking down these barriers has been a significant focus for the Digital & Events team's innovation program, where small product iterations have had the potential to unlock powerful engagement improvements for clients.

QS Digital & Events was now in a stronger position to review its event offerings as products needing continual iteration.

Evolution and iteration

After the Digital & Events team had run an entire season of virtual events, the next phase was to develop an events innovation program focused on evolving the product offerings to ensure QS was delivering to the needs of both student and higher education stakeholders. This process involved testing new platform functionalities such as networking, short presentations, and other formats to not only support candidates in their discovery, but to enable informal conversations that had once seemed daunting online.

Evolutions of event were made by leaning into the value-add of the virtual space. Online platforms enabled the organisation to focus on regions instead of city-specific locations, tapping into surprising hotspots of high potential candidates outside of the major cities typically covered in a virtual tour.

As a result, QS events gained a larger audience, and became more flexible in offering different timeframes. In North America, the Digital & Events team introduced two-minute video pitches at the start of fairs so students would have even further guidance in finding their right-fit institution.

Further product features were tested to increase engagement levels, and themed discussion rooms at fairs were introduced to enable small group, roundtable-style discussions. In addition, the QS team offered breakout booth presentations and network lounge spaces, which had proven to further casual conversation in trials by 290 percent.

QS also began better utilising its own qualified admissions consultants from QS Enrollment Solutions, helping prepare candidates for more meaningful conversations with partner institutions.

POSTECH

POHANG UNIVERSITY OF SCIENCE AND TECHNOLOGY

THINK BIG GO TOGETHER

POSTECH, as **Korea's first research-oriented university**,
was founded to conduct cutting-edge research and to raise global leaders.

Recognized for its excellence internationally,
POSTECH has ranked as **world's third best small university** for two consecutive years.

Today, POSTECH is **a pioneer in groundbreaking research**
and continues to be an entrepreneurial university that nurtures fearless thinkers for the world.

Results

The QS Digital & Events team was assured through the feedback-driven iterative process that it was better meeting institutional partner needs through a disruptive time to the sector. The steady flow of student interest in QS events also gave the organisation all the information it needed to continually improve its event offerings.

In 2020, QS virtual fairs gained an average of 650 students per event with over 99,000 registrations in total.

After surveying student attendees, the Digital & Events team identified a strong return on investment for students:

- 78 percent intended to apply to more than two universities they had met at the event, with 78 percent having been in contact with at least two schools post-event

- 77 percent met with universities they were not familiar with

- 69 percent said the QS fair helped them make a study decision

In addition, partner institutions saw real value in utilising QS's significant database of both attendees and non-attendees, with 93 percent of prospects being contacted by at least two schools after they had registered for an event.

Come to HUFS Meet the World

Hankuk University of Foreign Studies (HUFS)

Hankuk University of Foreign Studies, Leading a Globalized Korea

Hankuk University of Foreign Studies (HUFS), since its foundation in 1954, has been at the forefront of
Korea's development, often dubbed the Korean miracle,
serving as a pioneer and driving the economic growth and globalization of Korea.
HUFS, a truly global university that fosters innovative leaders of the future.

Designated as a Specialized Educational Institution for Critical Foreign Languages

The enactment of the Critical Foreign Languages Education Act has expanded the platform for HUFS students majoring in critical foreign languages such as Vietnamese, Arabic, and Portuguese to grow into area specialists by gaining knowledge and experience transnationally. HUFS's prestige as the leading global university in Korea has been enhanced through university-wide academic programs such as HIMUN (HUFS International Model United Nations), which marks its 43rd anniversary this year, and a wide range of globalization programs which include the '7+1 Student Dispatch Program' where students study at overseas universities for one term, 'Honors Program for Area Specialists' to train and nurture area specialists with knowledge and practical experience, and a global internship program under which over 300 students gain on-the-ground overseas work experience annually.

- **Global Education Infrastructure**
  HUFS teaches 45 languages in 52 language majors
- **Academic Exchange Agreements**
  Signed with 832 universities and institutions in 98 countries
- **International Exchange Programs**
  Number of HUFS students dispatched overseas : 1,843
  Number of international students placed at HUFS : 636

Departments that Foster Global Leaders Prepared for the Ubiquitous High-Tech Era with a Convergence Mindset

- **EICC (English for International Conferences and Communication) Department**
  The best Interpretation and Translation Curriculum in Korea
- **ELLT (English Linguistics & Language Technology) Department**
  The first-ever department that combines language and technology in Korea
- **LD (Language & Diplomacy) Division**
  An 'Elite Diplomat Academy' that nurtures future diplomats with the full range of competencies exemplified by HUFS
- **LT (Language & Technology) Division**
  An 'Elite Trade Academy' that leads global industries and international trade
- **GBT (Global Business & Technology) Division**
  Equips students with English language skills, IT capabilities, and a business mindset to become business leaders in the 21st century
- **BME (BioMedical Engineering) Division**
  Fosters education that integrates the biomedical and engineering fields by fully utilizing IT

HUFS, A Global Hub at One with the World , has been visited by prominent political leaders

Starting with former President Washington Beltran of Uruguay in 1975, HUFS has had the honor of hosting heads of state from around the world such as Hungary, Poland, Mongolia, Portugal, and Indonesia, and most recently former President Barack Obama of the United States in 2012, not to mention Ministers and Vice Ministers of Foreign Affairs, Prime Ministers, Speakers of Upper Houses, and Speakers of Parliaments from many nations.

- **Heads of state who visited HUFS (44 visits in total paid by heads of state, including 22 former and incumbent Presidents)**
  - Barack Obama, former President of the United States (2012)
  - Mikhail Gorbachev, former President of the Soviet Union (2001)
  - Joko Widodo, President of Indonesia (2018)
  - Anibal Antonio Cavaco Silva, former President of Portugal (2017)
  - Tsakhiagiin Elbegdorj, former President of Mongolia (2016)
  - Bronisław Komorowski, former President of the Republic of Poland (2013)
  - Laura Chinchilla Miranda, former President of Costa Rica (2012)
  - Pal Schmitt, former President of Hungary (2012)
  - Abdullah Gul, former President of Turkey (2010)
  - Georgi Sedefchov Parvanov, former President of Bulgaria (2009)
  - Lech Kaczynski, former President of the Republic of Poland (2008)
  - Traian Basescu, former President of Romania (2008)
  - Elias Antonio Saca, former President of El Salvador (2006)
  - Leonel Fernandez, former President of the Dominican Republic (2006)
  - Traian Basescu, former President of Romania (2005)
  - Joseph Kabila Kabange, former President of the Democratic Republic of the Congo (2005)
  - Stanislave S. Shushkevich, former President of Belarus (2004)
  - Ernesto Samper Piazano, former President of the Republic of Colombia (1996)
  - Zhelyu Mitez Zhelev, former President of Bulgaria (1995)
  - Alberto Kenya Fujimori, former President of the Republic of Peru (1993)
  - Fidel Sanches Hernandez, former President of El Salvador (1982)
  - Washington Beltran, former President of Uruguay (1975)

HANKUK UNIVERSITY OF FOREIGN STUDIES

The QS team also held 201 Connect events in 2020, with an average of 381 student registrations per event. The team again went to their survey data to gauge how students responded to the Connect experience, and this is what they had to say:

- 85 percent planned to apply to at least two schools they met

- 81 percent said that the event helped them to make a study decision

- 62 percent intended to apply to a university six months after meeting at a QS Connect event

When reviewing client feedback, the QS Digital & Events team found a great deal of insight and information that continues to help iterate through 2021 and beyond.

"I think this was one of the best graduate fairs I've worked this year," says Marco Lean, Senior Associate Director at the University of San Francisco and QS fair client.

"Once I began meeting with the students, I found that many of them had already had information on our programs,"

"69 percent said the fair helped them make a study decision."

Conclusion

The QS Digital & Events team is continuing to push beyond the expectations of clients and students with its offerings, providing the best value to attendees of QS's flagship series of recruitment fairs and Connect events. This iterative process requires a significant amount of sustained feedback from client partners, and in-depth student behavioural analysis.

To build on the momentum from its successful transition into the virtual space, the team took an invaluable back step to acknowledge the big picture challenges that recruitment partners had faced in making strong connections in the new virtual landscape, as well as

considering the study plans and expectations of students.

With an eye towards the future, QS is working towards supporting institutions through a post-pandemic student recruitment landscape that may require a blend of recruitment mechanisms. Regardless of what this landscape will look like, the organisation has witnessed first-hand how the pandemic has opened doors for institutions to more effectively utilise virtual events and digital marketing.

"After the vaccine rolls out, and the ability to travel opens up, we still believe that student recruitment will have changed forever," says Whittingham.

"Both virtual and physical recruitment events will continue to ensure strong return on investment and prove appealing from an accessibility perspective. Having the right mix of event products will only provide more recruitment options across every region of the world."

Jeonbuk National University, an Empathy and Innovation Platform

WORKING TOGETHER, YOUR DREAM WILL BECOME REALITY

Jeonbuk National University (JBNU), located in what CNN calls "The Best Taste City in Korea", is innovating, educating, and researching its way towards a reputation as "Tthe Best Glocal University" and an academic powerhouse. JBNU provides a strong academic foundation, fosters young talents to become leaders in society, and serves the region as a reliable partner in meeting challenges with achievable solutions. .

World-Class Research Competitiveness

With financial support from the Korean government, JBNU recently established a "Solar Energy-AI Fusion Engineering" graduate program that will train more than 100 integrated researchers over the next five years. JBNU is also recognized for its research and innovation in fields as diverse as renewable and hydrogen energy development, smart agricultural technology, carbon nanomaterial engineering, semiconductor development, Big Data analytics, and finance.

The Source of University Competitiveness; A World-Class Research Infrastructure

As a result of JBNU's research innovation leadership, the University has been selected as one of 21 institutions to receive government funding as part of its BK21 FOUR initiative. JBNU's research infrastructure and highly qualified pool of students and faculty have attracted proposals for joint research and technology transfer, and the attention of both developed and developing countries.

The Research Center for the Application of High Temperature Plasma has invested 40 billion Won in a 2.4 MW class plasma generator capable of recreating the extreme conditions experienced by spacecraft during reentry.

JBNU's Research Institute for Human-Animal Common Infectious Diseases, Asia's largest zoonotic pathogen research institution, is equipped with an Animal Biosafety Level 3 Research Facility
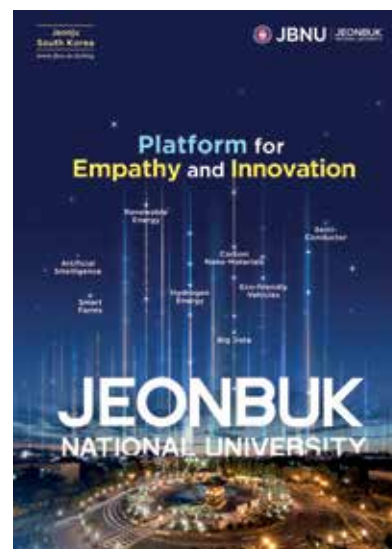

that permits groundbreaking research on high-risk pathogens such as MERS. This year alone, the Institute spent 1.7 million US$ on research, including the investigation of potential COVID-19 vaccines, the development of preventive vaccines for human brucellosis, and exploring new integrated solutions to the problems of novel viral infections.

Competitiveness Recognized by University Ranking

Supported by its history of scientific achievement, JBNU aspires to be the equal of other top universities from around the world. Prominent university evaluators including QS, Reuters, and THE recognize JBNU's competitiveness, as local governments, companies, universities and research institutes gather in Jeonbuk to advance research, expand knowledge, and develop the technologies of the future.
